

**AMENDMENTS TO THE SPECIFICATION**

Please amend the paragraph beginning on page 5, line 27-33, as follows:

The aforementioned rivet (4) goes through the pulley (2), the support device (3) via a hole (10) as shown in Figure 3. It also passes through the rail ~~(not shown)~~ 20. The support device (3) is rigidly attached to the aforementioned rail and is symmetrical in shape with regard to the longitudinal axis, which allows the same piece to be used (3) on the upper and lower part of the window lifter rail.
